hcherkaoui.github.io Hamza Cherkaoui hcherkaoui Hamza Cherkaoui

Interests

Statistics; Bandits; Fairness; Convex Optimization; Dictionary Learning; Neural Networks

Research experience

2022–
Post doctorate position

Post doctorate position, Huawei Technologies, Paris, France

- *Supervisor*: Dr. Igor Colin
- *Bandits, Statistics, Fairness.*

2021
Post doctorate position

Post doctorate position, BioMaps research team, CEA-Saclay, Orsay, France

- I continue my research on the estimation of the Haemodynamic Response Function (HRF) from fMRI data in a pharmacological context.

2017–2021
PhD program

PhD program, PARIETAL research team, CEA-Saclay / INRIA-Saclay, France

- *Research subject: 'Efficient whole brain estimation of the haemodynamic response function for TV-regularized semi-blind deconvolution of neural activity in fMRI'*
- *Supervisors*: Dr. Philippe Ciuciu, Dr. Thomas Moreau and Dr. Claire Leroy
- Published 5 International Conference Proceedings and 1 Journal Articles.

Education

2016–2017

Master program, Ecole Polytechnique, Palaiseau, France

- *Master of Research:* Data Sciences
- Cross disciplinary courses: Machine Learning Theory, Kernel methods, Convex Optimization.

2015–2016

Master program, University Lille 1, Villeneuve d'Ascq, France

- *Master of Research:* Applied mathematics
- Focused on Probability and Statistic.

2012–2016

Ecole Centrale de Lille, Villeneuve d'Ascq, France

- *Master of Engineering:* diplome d'ingénieur de l'Ecole Centrale de Lille.
- Cross disciplinary courses centered around mathematics and computer science.

Other Experiences

2017
April–September

Researcher assistant (internship), PARIETAL research team, Neurospin laboratory CEA-Saclay, France

- I searched to optimize the reconstruction process of MRI images to enhance image quality with Compressed Sensing tools.

2016
June–August

Research engineer (internship), MODAL research team, INRIA Lille, France

- *Software development project:* Development of a new R package providing tools to cluster categorical functions with on an efficient `C++` implementation.

2015
April–July

Software developper (internship), DataRobot, Boston, USA

- *Software development project:* Implementation of the decision tree induction algorithm (from `Scikit-Learn`) used in the start-up to support multi-threaded training.

2014
May–December

Software developper (internship), Logilab, Paris, France

- *Software development project:* Implementation of a Python library based on `CGAL` library (`Python/C++ binding`) & development of a web-client toolkit to use a computation platform.

Languages & Computer Science skills

- *French:* mother-tongue
- *English:* (TOEIC 970/990) fluent
- *Collaborative tools:* `Git`
- *Languages:* `Python`
- *Libraries:* `Numpy, Pandas, Numba, pyTorch, Scipy, Scikit-learn, Nilearn`

Developped Open Source Python packages

2020 **Carpet**, Fast-minimization of Total Variation regularized problems. carpet
- Minimize 1d TV regularized problems with neural network.

2019 **HemoLearn**, Multivariate estimation of the HRF from fMRI data. hemolearn
- Disentangle the neurovascular coupling from the neural activation signal in a multivariate fashion for fMRI data.

2018 **pyBOLD**, Univariate estimation of the HRF from fMRI data. pybold
- Disentangle the neurovascular coupling from the neural activation signal in a univariate fashion for fMRI data.

2018 **pysap**, MRI image reconstruction. pysap
- MRI image reconstruction based on Compressed Sensing (CS).
